10. Consumer products		10. Technical control	10. Test report
11. Industrial processes		11. Surveillance	11. Marks and labels
12. ...		12. ...	12. ...

Conformity assessment is divided into 3 service lines

Testing

- ▶ Determination according to a procedure of one or more characteristics of products

Inspection

- ▶ Examination of a design, product, process or installation and determination of its conformity with specific requirements or on the basis of professional judgment

Certification

- ▶ Third-party attestation of conformity related to products, processes, systems or persons

**Some of these services are mandatory
Some of these services are voluntary**
